RESEARCH EXPERIENCE

University of Michigan, Ann Arbor, MI USA
Graduate Student Research Assistant to John E. Laird August 2010 - present
Learning tasks with situated interactive instruction
Studying task representations and knowledge-intensive learning algorithms that are useful in learning novel tasks from task-oriented dialog. The work addresses generality and transferability of acquired knowledge and mixed-initiative learning.

Situated language for embodied agents
Developing the Indexical model of situated comprehension that translates abstract linguistic symbols to grounded perceptual, spatial, and task knowledge for robots. The work investigates the role of situated context arising from perceptions, intentions, goals, and dialog in comprehension.

University of Michigan, Ann Arbor, MI USA
Graduate Student Research Assistant to John E. Laird January 2009 - August 2010
Reinforcement learning in Soar cognitive architecture
Designed, implemented, and analyzed reinforcement learning agents for Infinite Mario. Formulated and implemented modular reinforcement learning for the Soar cognitive architecture to simultaneously learn multiple markov decision processes.

Indian Institute of Technology, New Delhi, India

Research Assistant to Niladri Chatterjee

May 2007 - July 2007

Sense disambiguation, distributional semantics

Developed and analyzed a Random Indexing based algorithm for sense disambiguation of homonyms.

University of Delhi, New Delhi, India

Thesis with Shampa Chakravarty, Niladri Chatterjee

December 2006 - May 2007

Single document summarization, distributional semantics

Developed and analyzed an algorithm for single-document summarization using PageRank and Random Indexing.
